- **User customizable**

- **Works in Unity Personal** and **Unity Professional**

- Well commented code

- **Works on all platforms:** PC, MacOS, iOS, Android, WebGL

- **Optimized for mobile and tablet devices:** canvas will change on different screen sizes

5. GAME MANAGERS

5.1. AudioManager

AudioManager controls background music and sound effects used in project. It is also used to enable or disable sound and music in the settings popup. To change sounds just drag and drop new AudioClips on AudioManager script.

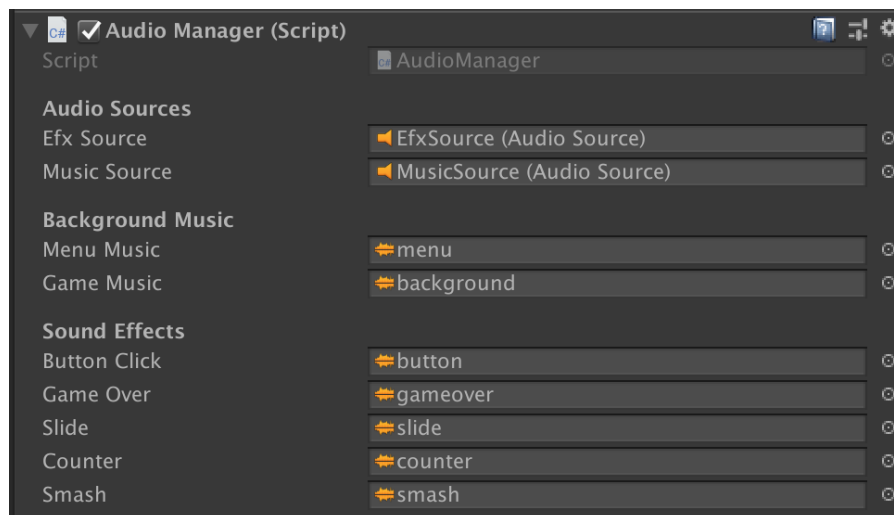

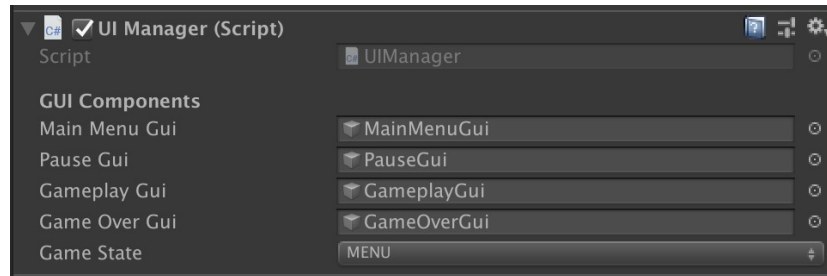

Picture 4: AudioManager

5.2. GameManager

GameManager controls the gameplay logic. To edit the game logic change this script to your own desires. To change obstacle colors just add new colors or edit current.
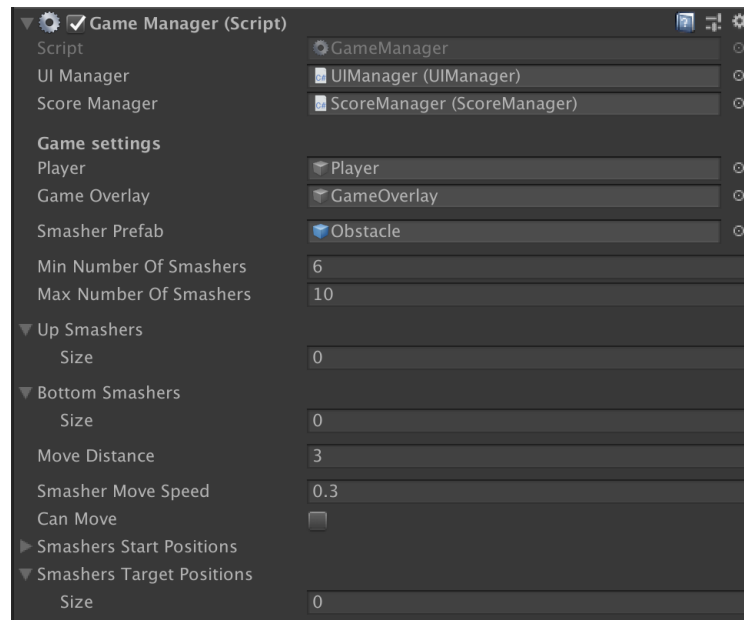

Picture 5: GameManager

5.3. UIManager

UIManager controls game states. Also it is used to show different GUI elements like Pause popup, GameOver GUI, etc...

Picture 6: UIManager

6. HOW TO RESKIN

6.1. GRAPHIC

Almost all graphic elements are located in the folder **Assets/SmashOut/Sprites**. To use your own images replace image files and do not forget to keep the same name, size and **PNG** format (else you will need to change prefabs, object positions...)

6.2. AUDIO

Audio files are located in the folder **Assets/SmashOut/Sounds**. To replace your own music and sounds replace files in this folder, keep the same names and format **WAV**.

6.3. IMPORTANT

Before publishing project on app stores, we encourage you to reskin the game and add new functionalities.
